*It's a pleasure to produce and build web pages according to their audience's goals, needs, and targets. From research, to user testing, wireframing, prototyping, to programming and building, the focus is on what users and websites want to accomplish end to end products and web apps. Leading multiple design projects, communicating with clients' teams, gathering feedback and incorporating it into decisions. Working with data engineers to develop data-driven UI/UX dashboards and search applications.*

## PROFESSIONAL EXPERIENCE

**LUCIDWORKS**                                                                   **San Fransisco, CA**
UI/ UI Designer and Developer                                                        *July 2016–Present*

- Utilizing AngularS and React frameworks to design, prototype, and code the UI for internal search web applications for Exxon, Morgan Stanley, and Honda. Building and redesigning signals and dashboards, coding to functional web search applications, and deploying to different environments.
- Developed over 50 search applications, dashboards analytics and signals for a number of well-known clients.

**CIVIC RESOURCE GROUP**                                                           **Los Angeles, CA**
UI/ UI Designer and Developer                                                              *2015-2016*

- Understanding of goals and user research, creation of wireframes, mockups, and prototypes to achieve those goals, and communicating outcomes with developers on government projects such as LA Health Care and 511.org. Most of websites were built on AngularJS.

**IBRAND LLC**                                                                     **Los Angeles, CA**
UI/ UI Designer and Developer                                                              *2013-2015*

- Executed creative layouts and coded landing pages for multiple affiliate programs, using HTML, CSS, and JavaScript. Tasks are completed in a fast-paced manner on a day-to-day basis, with a limited timeframe for each project.

**ANER GROUP**                                                                     **Los Angeles, CA**
UI/ UI Designer and Developer                                                              *2012-2013*

- Researched and developed mockups of admin dashboards and forms based on user research with specific targeted communities, such as doctors and pharmaceuticals.

**ART INSTITUTE OF LOS ANGELES**                                                        **Los Angeles**
Bachelor Science of Web Design and Interactive Media                                        *2009-2012*
